

IV. About the PCB date code mark

1. Composition of PCB date code

PCB date code specifies the date of manufacturing, the production factory and RUN no. by using within 4 alphanumeric characters.

1-1. Specification of the date of manufacturing

The date of manufacturing is specified by dividing the product year, month and date. The year, month and date are marked with alphanumeric character according to the table below.

How to mark

1. The final digit of year is divided into odd year and even-numbered year.
If it is the odd year, please see the below table “A”.
If it is the even-numbered year, please see the below table “B”.
2. The product month and date are numbered according to the below table “A” or “B”.

1-2. Specification of the production factory

The production factory is marked according to our original code.

1-3. Specification of the RUN no.

General rule:

Pre-production sample is no marked.

Mass-production sample is marked “0”.

Mass production is marked "1", "2", "3"....
